

# Fly Tulsa Pledge

Tulsa International Airport (TUL) provides an efficient, global gateway for business and vacation travelers to and from our region. **Air service retention and expansion is a critical component of our regional development plan and essential to support the continued growth of our core industries.**

National competition between communities for sustainable, reliable, and convenient air service has never been more intense. As the Tulsa regional economy grows, so does demand for air service. However, **we have the ability to stimulate additional nonstop air service based on our existing demand with one simple step – asking our business and vacation travelers to fly from Tulsa International Airport.**

**Community leaders from all sectors must come together to Fly Tulsa in order to impact meaningful improvements in service.** This travel policy guideline is provided to regional employers, local units of government, and business leaders for their consideration in order to implement air service travel policies for their organizations that promote the utilization of TUL as the airport of choice when traveling by air.
